DARAMIO

Modern LED-Lit Mirrors for Every Interior.

Mirror heating

User Manual / Assembly Instructions

Mirror heating

TECHNICAL SPECIFICATIONS

- The heating mat prevents the mirror from fogging and keeps the central area clearly visible at all times.
- The heating mat is switched on using the built-in touch button.

SPECIFICATIONS

Placement:	in the center of the mirror
Heating mat size:	The size of the heating mat is adjusted to the dimensions of the mirror; we always choose the maximum possible size.
Placement of the touch button for the heating mat:	at the bottom center of the mirror.
Power consumption	~ 1,5-2,5 W/dm2
Component power supply	230 V AC

HEATING MAT CONTROL

1. After connecting the mirror to the power supply, the touch button for the heating mat will light up white.

2. By briefly pressing/touching the button, you turn on the heating mat; the button will light up red.

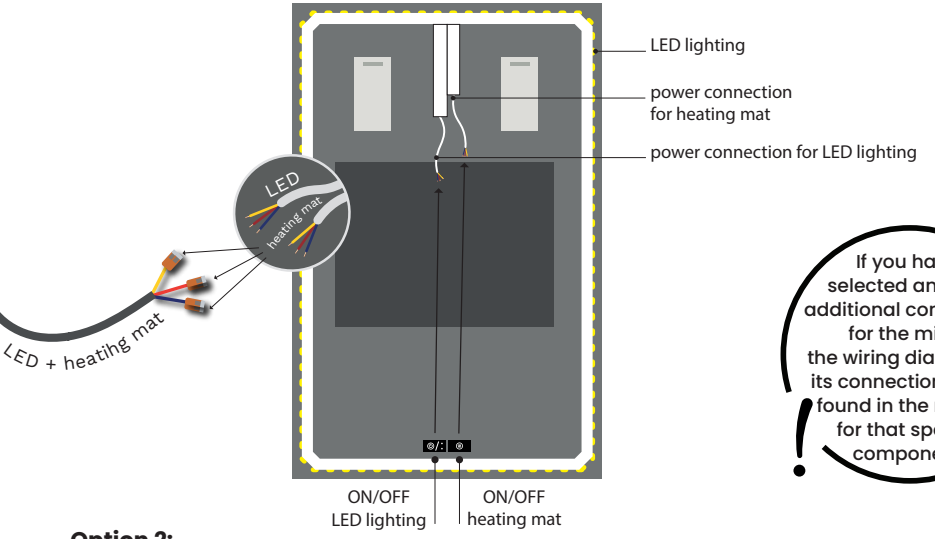
3. The fogging will start to disappear within two minutes, and after five minutes the mirror will be fully clear.

4. Thanks to manual control, you have full control over the heating; once warmed up, simply turn it off by pressing the touch button again.

Recommended connection options for connecting the mirror to the power supply

Option 1:

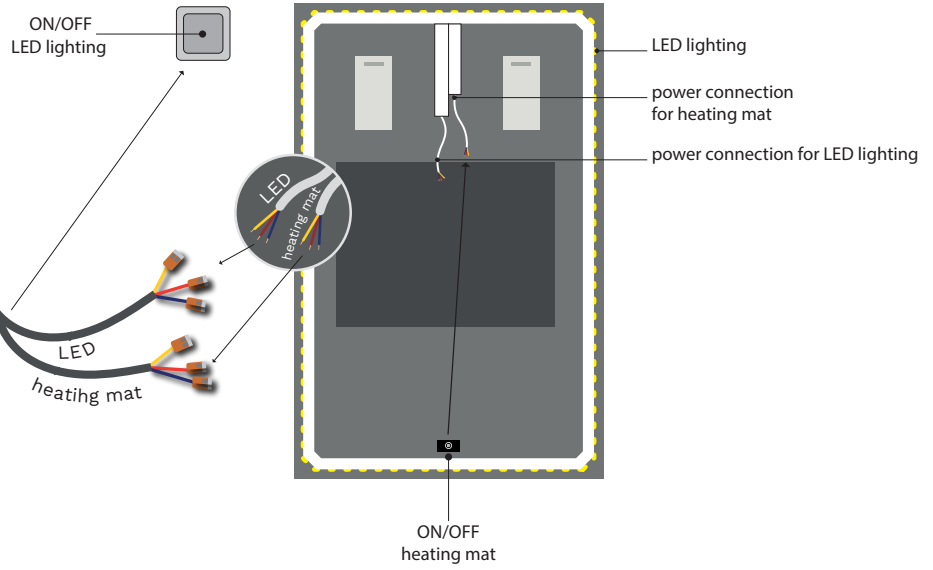
Connection of the LED mirror lighting and the heating mat to the power supply when selecting the touch button/sensor switch.



If you have selected another additional component for the mirror, the wiring diagram for its connection can be found in the manual for that specific component.

Option 2:

Connection of the LED mirror lighting and the heating mat to the power supply when selecting an external switch.

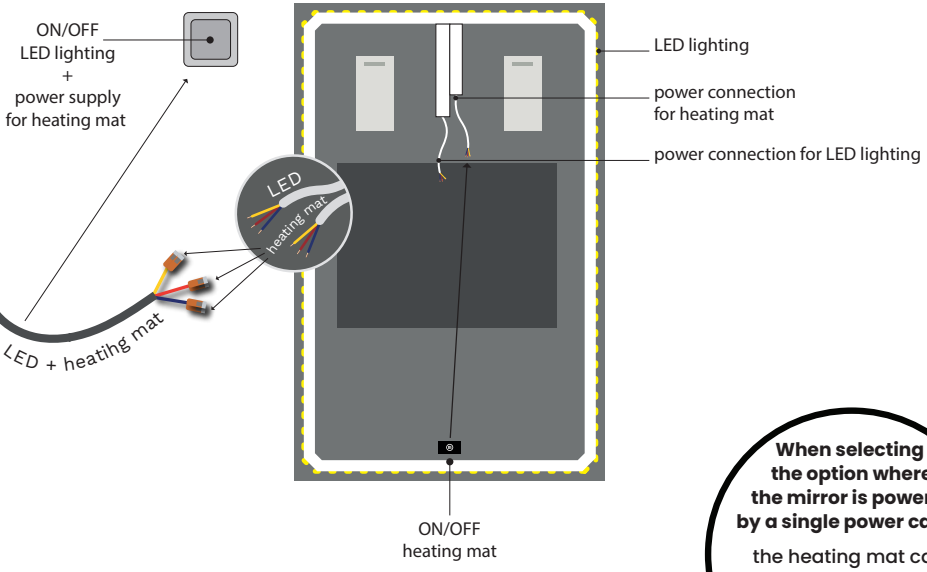


Each component has its own manual with a wiring diagram.

Recommended connection options for connecting the mirror to the power supply

Option 3:

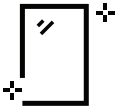
Connection of the LED mirror lighting and the heating mat to the power supply when selecting an external switch on a single power cable.



When selecting the option where the mirror is powered by a single power cable:

the heating mat can only be turned on after the LED lighting has been switched on using the external switch.

Each component has its own manual with a wiring diagram.



Thank you for choosing our product.
